

# Cloud PC Backup

TGgo Cloud PC Backup Service is an advanced agent base cloud backup solution for SMB customers. By integrating reliable and high-speed connectivity, TGgo has been able to provide a secure and reliable data protection solution to meet growing needs of customers.

Powered by Hitachi Data Systems

If you find yourself now in a situation where you have to deal with an explosion in the volume of your business data, you are not alone. The accelerating pace of data creation, accumulation, and diffusion is becoming an increasingly common phenomenon among companies throughout the world today.

## The Challenges

Suppose for a moment that a virus infects your entire network. The virus spreads through every employee's workstation, into every document and database file. All your work, all your data - they're all destroyed.

Without an adequate backup and recovery plan, your business is at risk. Because your company relies on its

data and mission - critical applications, the cost of downtime is exorbitant, potentially exceeding thousands of dollars per hour for such expenses as recovering data and system files, replacing equipment, losing productivity, and losing customers.

## The Solution

TGgo Cloud PC Backup is a total data backup solution for small office and home office. It supports backup of mission critical data in your local desktop, notebook and even Office 365 Exchange Online account to TGgo Cloud storage to prevent data loss due to hardware failure, human error, theft, or any other disasters.

TGgo Cloud PC Backup is leveraging Ahsay's Advance Backup Suite to

provide a secure cloud backup service to our clients combined with our reliable connectivity & enterprise class cloud infrastructure. Ahsay is an advance client-server based on-premises and cloud backup solution for Businesses. The whole solution can be deployed within a company to backup all desktops, notebooks, even servers and virtual machines to cloud.

TGgo offers two client backup agents. AhsayACB is for backing up data from desktop and Notebooks. AhsayOBM is for backing up data from servers, databases, virtual machines and Office 365 Exchange Online. They are fast and equipped with many dedicated database and virtual machine modules for you to properly back up your databases, VMs and email applications.

## Key Benefits

### Various Dedicated Backup Modules

Dedicated backup modules can be used in conjunction with backup agents to let you back up VMware, Hyper-V, Microsoft Exchange Server, Microsoft SQL Server, Oracle and MySQL Databases, Lotus Domino / Notes, Windows System, System State and Office 365 Exchange Mailbox professionally.

### High Speed

They are the fastest backup applications equipped with all speed optimizing technologies, such as multi-threading, In-File Delta, fast indexing, small files optimization, etc. Speed hungry customers will definitely love them.

### High Scalability

As the number of users grows, TGgo can scale up the backup system easily by using the built-in Redirection Module for redirecting the extra user traffic to other AhsayCBS servers.

### Manageability

Real time system status, current backup and restore jobs, errors and warnings, etc. are available at a glance for monitoring and troubleshooting.

### Restorability Guaranteed

No one wants to experience trouble during restore. Therefore, you need a backup solution that can guarantee the restorability of your backed-up data. With the built-in CRC data integrity checking, verification and rectification, your backup data are 100% restorable.

### Super Secure Encryption Modules

Both AhsayOBM and AhsayACB can generate a truly randomized 256-bit full length AES encryption key to encrypt the backup data by default. Such encryption is simply unbreakable by any super computer.

### Pay-as-you-go

Monthly payment, low initial investment thus low entry cost for cloud backup.

### Experience

Trial accounts are available for you to experience the benefits of TGgo Cloud PC Backup service can bring to you.

## Specification

	AhsayACB	AhsayOBM
Supported operation systems	<ul style="list-style-type: none"><li>• Microsoft Windows Vista / Windows 7 / 8 / 8.1 / 10 or above</li><li>• Mac OS X 10.7.3 or above</li></ul>	<p>Cover all AhsayACB supported OS and</p> <ul style="list-style-type: none"><li>• Windows Small Business Server 2008 / 2011</li><li>• CentOS 6 / 7, Red Hat Enterprise Linux 6 / 7</li><li>• UNIX – Solaris 10 / 11, FreeBSD 9.0-10.1</li></ul>
Hardware requirements for both agents	<ul style="list-style-type: none"><li>• Dual Core architecture or above</li><li>• Minimum 2GB RAM, 4GB recommended and Minimum 500MB disk space</li></ul>
